EDUCATION

University of California, Irvine   June 19, 2023

- Candidate for a Bachelor of Science degree in Informatics   GPA: 3.64/4.0
- Relevant Coursework: Python, C++, Data Structures and Algorithms, MIPS Assembly

PROJECTS

QR Codes on Big Display   September 2022 – Present

Back-end Developer – Summit Tech Laboratories

- Implemented a CRUD application with four others using Angular, ASP.Net, and MySQL
- Developed unit tests for our APIs, and manually tested with Postman
- Recorded formatted information using Log4Net according to sponsor's specifications
- Learned how to follow an Azure DevOps workflow, such as publishing to a folder on a virtual machine, merging pull conflicts, and developing a working pipeline on time

Priority Lists Web App   December 2022

- Implemented an Angular web app that allows a user to input, shift, or delete strings in separate lists, storing the text onto a local database retrievable with a password
- Worked with the HandTracker library to enable accessibility, using the user's hands and shapes to either enter a string, hide a certain list, or store information onto the database

T-Shirt Store   January 2023

- Created a Java app that stores products onto a store for a user to "buy" through a menu
- Used a terminal to stage, commit, and push each new iteration of code onto the project

ACTIVITIES

Amazon Fulfillment Center   Eastvale, CA
Level 1 Warehouse Associate   June 2021 – Present

- Fulfilled quality and safety standards full time, accepting coaching swiftly
- Took initiative to report critical issues to leadership
- Transitioned to other needed roles smoothly as directed by management

TECHNICAL SKILLS

- **JavaScript, TypeScript, HTML, CSS, Angular**
- **C#, ASP.Net, MySQL, Git**
- **Java, Python, C++**
